Update in Pediatric Trauma Care  
**Friday, April 5, 2013**  
**Conference Center** (Corner of Church and Palisades)  
**Marian Regional Medical Center**

Recognizing the serious need for education and training in the areas of pediatric trauma and injury prevention, the Kiwanis Cal-Nev-Ha Foundation established the Pediatric Trauma Program with the mission to reduce the number of children who are killed or injured by accidents. Pediatric trauma, or unintentional injury, remains the leading cause of death among children ages 14 and under in the United States. The objectives of the presentation by Andrea Thorp MD, Associate Professor and Kristin Ratnayake MD from Loma Linda University Medical Center and Children’s Hospital will include:

- Compare and contrast injury patterns from blunt head, neck, and abdominal trauma in pediatric and adult patients
- Modify the evaluation of a traumatized child based on history and physical examination
- Manage burns in a child and identify when burns require forensic evaluation
- Prepare the necessary elements that allows continuation of trauma care at a tertiary facility

Lunch will be provided by the Santa Maria Noontime Kiwanis.
